Inaugural Address of Honorable Richard J. Daley, Mayor.

Honorable Richard J. Daley, delivered the following address to the City Council, which was on motion of Alderman Bilandic, ordered published in the Journal of the Proceedings:

> I speak today to the people of Chicago with mingled feelings of humility and pride and with a renewed sense of confidence to meet the challenges that lie ahead.
>
> Since my first inauguration as Mayor of Chicago, I have asked nothing more of my fellow citizens than to be judged by my performance as chief executive of this great city.

There could be no greater reward for me than the vote of confidence given the policies of our administration in the election of April 1st. For myself, for my good wife and for the members of my family, I want to take this opportunity to express my gratitude to all the people who voted for me, to those of my party and to the many others of every political belief who worked so long and so hard to bring the issues to the voters. I know that City Clerk John Marcin, and City Treasurer Joe Bertrand are equally appreciative.

To me this was more than an election victory. I have always run as a Democratic party candidate. I am proud to be a Democrat. I believe in the party system. As Mayor, however, I have sought to serve all the people of Chicago—Democrats, Independents, Republicans—of every economic group, of every neighborhood.

The result of the election was an expression by the voters that they had confidence in my single desire to serve the public interest. Today I renew my pledge to the people of Chicago, my best efforts and dedication to this principle.

Today, you who have been elected to the City Council, and I as Mayor, begin the task of carrying out the mandate given us by our fellow citizens. I know that you are as pleased as I am that we will serve during the commemoration of our nation's Bicentennial.

We will begin carrying out our responsibilities in a nationwide atmosphere of doubt and uncertainty, caused by inflation, recession, unemployment, rising crime, the problems of cities, Watergate and what appears to be a loss of leadership and prestige in the conduct of world affairs underlined by the tragedy of Indo-China.

It is no wonder that there has been a grave mistrust and disillusionment with government and a feeling of pessimism and frustration as to the future.

I have never shared that pessimism, and the historical events which give life and meaning to the Bicentennial celebration bolsters my confidence in the future of this nation and this city.

Of course, we are a vastly different nation than the agricultural country of 1776 occupying a narrow band of the Atlantic coast. But the resourcefulness and courage of the Founding Fathers in facing problems of a changing world that seem to defy solution, their determination to bring to an end to despotism and to make a better society, planted roots that have never dried up in America.

I am fully aware of the economic pressures and self-interests that underlie the Revolution and will continue to motivate men and nations. But these two centuries of American history can be described as 200 years of rising aspirations in pursuit of the democratic ideal: to live harmoniously in the midst of diversity—to guarantee liberty—foster toleration—and provide equal opportunity in a society governed by law and held together by social unity. In those 200 years our country has met and overcome crisis after crisis and maintained our democratic republic. In two centuries we have become the greatest of nations with an enormous diversity, population, wealth and power, with a standard of living unchallenged throughout the history of the world.

Like the Colonists, we face a world of great change—political, economic and social. The demand of rising aspirations for opportunity and a better society are still inherent in our American society.

For much of our history this demand has been met by the utilization of a vast frontier. That frontier was not only the forest, the farm and the unlimited land of America—it was the opportunity provided by the cities of our nation.

Historically, the city has been the catalyst of social innovation and progress. The city has been the place where the newcomer was welcomed and where he found opportunity for himself and his family.

The role of the central city today is unchanged. As society becomes more urban, there will be a continuing migration to the central city for those who seek employment and opportunity. It will continue to be the primary place of employment for those who live outside of the city. The central city is still the innovator for the social inventions so urgently needed to solve the problems caused by the far-reaching economic, political and social changes.

The central city is the new frontier of urban society.

There are some who say that the central city has failed to fulfill the goals of rising aspirations envisioned by President Kennedy's New Frontier and President Johnson's Great Society.

Their aspirations were based on an affluent economy—and the progress and breakthroughs that had occurred in the fields of science, technology and communications. Advances which in the past 25 years had been more rapid and far-reaching than in the past 100 years.

They assumed, as we all did, that as science and technology improved our material and physical world, they would make an equal contribution to the betterment of our social world and environment.

But there has been a critical imbalance between physical and social progress.

It is far easier to mobilize the resources of science and technology, to put a man on the moon and to transplant the heart, than to clear a slum, preserve a neighborhood, give every child quality education, erase discrimination and preserve full employment.

These social endeavors cannot be controlled in a laboratory. They call for a mobilization of human commitments—for people communication—for social values that cannot be stored and reproduced in a computer.

And in these same 25 years we saw a Federal policy that encouraged a flight to the suburbs by people and industry.

Suburbs that could not replace the leadership of the central city in responding to the essential needs of an urban society.

It is the central city that did respond. In Chicago we launched and carried out hundreds of programs, many of them new and untried, to make the city and our society a better place in which to live.

Urban Renewal, Code enforcement, Public Housing, expanded and improved Medical Care, neighborhood Health Centers, Mental Health Clinics, Human Relations Commission, a professional Police Force, the Poverty Program, Job Training, Public Service Employment, Model Cities, the prevention of air and water pollution, consumer protection, modern building codes, summer recreation programs, incineration, improved mass transportation, filtration plant, the Lakefront Ordinance, economic development, better lighting, cleaner streets, services for Senior Citizens, housing for the elderly, fair employment standards, modern public works, expressways and airports, new schools, libraries, parks and playgrounds, new colleges, the Circle Campus and a host of other programs and projects designed to serve people, the neighborhoods, the City and the Metropolitan area.

I would be the last to say that these programs solved the accumulated ills of the city or were able to meet the rising aspirations and expectations of many of our people. But without them—and without the support of the people of Chicago—there would be no viable central city and there would be no thriving, healthy suburbia.

There are no isolated communities. Those who thought city limits were walls or real barriers to economic and social problems have discovered that they are deluding themselves. In this urbanized society, we all live as a part of a total economic and social entity, regardless of geographical boundaries and political representation.

The problems of welfare, health, crime, education, housing, employment, environmental control and transportation are not only the problems of the city, but affect every citizen, no matter where he lives. Their solution requires national resources and the commitment of the entire metropolitan area. There are many reasons for the lack of greater progress in the cities. The amount of Federal money appropriated for urban programs, in many instances was nearly always too little, and often too late.

The Viet Nam war not only diverted funds from these programs, but created a wave of destructive dissent that was not concerned with real and feasible solutions, but focused on goals which were unattainable and without public support. Encouraged by news makers, these activities produced nothing but confusion, confrontation and diversion.

Under the Nixon administration funds were frozen by a policy of executive impoundment that defied the intent of Congress and reversed the gains that were being made in programs of housing, employment and environmental control.

The cities were also confronted with a Federal bureaucracy that sought to administer local affairs by national regulations and detailed guidelines. They only hampered and frustrated those that were responsible for the administration of local government and who were in direct touch with the needs of people and their communities.

I am optimistic about the future because I believe that past experience has made us a wiser people.

We will no longer commit ourselves to a foreign policy that believes that we can buy the will for democracy and international harmony. We will no longer sacrifice Americans in futile wars. However, we will continue our leadership role for peace in the world.

We will give first priority to our domestic needs. There is no greater contribution to be made to the world than the example of American democracy making a better society for all its citizens.

I believe that there is a national consensus that the problems of the city are national problems. There will be a full commitment to help cities provide essential services which can best be administered by local government directly responsive to its citizens.

I am sure you all feel, as I do, that much more is expected of us than just the continuation of programs now under way. I know that you will be submitting proposals for consideration by the Council. In doing so, we must be careful not to present goals as programs. For example, there is universal agreement that we must eliminate slums, rehabilitate housing and provide incentive for the construction of new homes. But the repetition of these objectives as specific programs, contributes little and creates expectations which are impossible to fulfill.

This kind of approach over-simplifies complex and difficult undertakings which require huge sums of money, Federal participation and careful planning.

A comprehensive housing program is not just a matter of constructing buildings. When people say they want good housing they mean they want several things, including Police protection, the ability to walk the streets without fear, decent behavior patterns by their neighbors so that they are not threatened by crime and vandalism or poor property maintenance, good schools, recreational facilities, shopping centers, transportation, adequate public services and rent and mortgages they can afford.

Above all, there must be a consensus—a commitment not only by government—but by people—by the neighborhoods affected. The Police alone cannot reduce crime and make the streets safer. They must have the active cooperation of the public.

To gain the support of the public, there must not only be widespread community participation, but the programs must be realistic. Otherwise, we create false hopes that end in disillusionment. Because we cannot arrive at achieving goals is no reason not to do the best we can to move toward them. That is really what progress is all about.

Being realistic means that the public understands that there are few programs that can satisfy every individual, every interest. We must do the best we can within our power. The news media can be a positive force in this direction by accurately presenting information and all of the views —not just highlighting those whose voices are loudest—but the voice of the community.

In the weeks ahead I will submit for your consideration, detailed recommendations concerning the Police Department and safer streets, housing, greater employers program, community development, education, recreation, employment, senior citizens and other programs of high priority.

Above all, the public is looking for leadership which is willing to address itself realistically, courageously and conscientiously to the work of making our communities better places in which to live. They will respond to that leadership, to that end, all of us, I know, will work together. This is our mandate.

The improvements we have made in the City of Chicago could not have been possible without the hard work, the cooperation and the dedication of the members of the City Council, the Department Heads, the City Employees, Industry, Labor, the Clergy and the thousands of citizens who so willingly have given a helping hand.

To sum up, I think the goals of most of us in public service were stated by our late President John F. Kennedy when he said, "I believe in an America where every family can live in a decent home, in a decent neighborhood, where children play in parks and playgrounds, not the streets of slums; where no home is unsafe or unsanitary, where a good doctor and a good hospital are neither too far away or too expensive and where the water is clean and the air is pure and the streets are safe at night".

RULE 26. A motion to lay any particular motion or proposition on the table shall apply to that motion or proposition only. RULE 27. Subject to the provisions of Rule 25, consideration of a motion or other proposition may not be postponed indefinitely. Governor and State Legislature Urged to Enact Legislation to Bring Sufficient Funds to City Colleges of Chicago.

A proposed resolution reading as follows:

WHEREAS, The City Colleges of Chicago are currently serving approximately 100,000 adults in 212 programs ranging from English as a Second Language to the Associate Degree in eight college campuses, 17 evening high school buildings, 13 Urban Progress Centers and 350 outposts, located mainly in inner city areas; and

WHEREAS, The Governor recognizes that inflation reduces the real income of employees and increases the cost of goods and services that institutions must purchase; and

WHEREAS, Additional funds to make possible the salary increase for community colleges in the State of Illinois was based on the aggregate budgets of the 47 community colleges in Illinois and on the premise that there would be an anticipated increase in the tax assessment and a corresponding growth in the local tax revenue of approximately 5%; and also on the premise that the growth in enrollment in community colleges in FY76 would result in a substantial increase of funds from student tuition, including payments from the Illinois State Scholarship Commission; and

WHEREAS, It is fairly certain that the City Colleges of Chicago will not receive any additional funds from any tax reassessment; rather, unless a bill pending in the legislature freezes the tax multiplier at the present level, the City Colleges of Chicago stand to actually lose 6% of its current tax funds; and

WHEREAS, The funds that can be anticipated by the City Colleges of Chicago from a higher state apportionment formula will be sufficient only to maintain the FY75 operational budget of the City Colleges of Chicago; and

WHEREAS, Common decency and the American ethic of humane assistance requires that we reciprocate their bravery by at least offering them asylum on our shores; and

WHEREAS, Almighty God, in His Infinite Wisdom, has called Josef Cardinal Mindszenty to his eternal reward on the 6th day of May, 1975, at the age of 83; and

WHEREAS, The late Cardinal, although born one of six children in the modest home of a farmer, became through the force of his convictions and his unflinching courage in adhering to his principles, one of the outstanding world figures of that decisive period of history known as the era of the Cold War; and

WHEREAS, Even at the time of his ordination to the priesthood at the age of 23, and even as an assistant pastor in small villages, he was animated by ardent patriotism and evinced great zeal in promoting the welfare of his native land, according to his convictions; and

WHEREAS, Even in 1919, when he was only 27, he was twice arrested by revolutionary regimes; and

WHEREAS, During World War II, after he had been consecrated a bishop, he was again arrested, this time by the Nazis, and marched off to prison in his episcopal robes, accompanied by an escort of seminarians, because he had, with the other bishops of Hungary, issued warnings to the faithful concerning cooperation with the Nazis and had publicly protested the Nazi deportation of Hungarian Jews, who were being exterminated by the hundreds of thousands in concentration camps; and

WHEREAS, After the war, in 1945, the Vatican elevated the anti-Nazi hero to be primate of Hungary; and

WHEREAS, He soon showed his disapproval of the Communist regime that had come to power in Hungary, and was thereupon arrested and subjected to six weeks of relentless interrogation, interspersed with beatings, after which he was drugged and exhibited to the world at a show trial, at which, on the basis of a "confession" so obtained, he was convicted of treason against the regime, and sentenced to penal servitude for life; and

WHEREAS, He was for seven long years moved from one prison to another, and was not released from solitary confinement until 1955; and

WHEREAS, With the crushing of the rebellion, he took refuge in the United States Embassy in Budapest, within the walls of which he remained for 15 years; and

WHEREAS, He repeatedly rejected efforts of the Vatican to secure his safe passage out of the country, implacably maintaining that the proper place for the Primate of Hungary was Hungary; and

WHEREAS, After he had demonstrated his love of freedom by remaining imprisoned for so many years, he was in 1971, when he had attained the age of 78, released from his responsibilities as Primate of Hungary, and he reluctantly consented to leave his native land to go first to Rome, where he was warmly received, and then to retirement in Vienna, close to his beloved Hungary; and

Congratulations Extended to Roosevelt University Upon 30th Anniversary.

Honorable Richard J. Daley, Mayor, on behalf of himself and the other members of the City Council submitted the following proposed resolution:

> WHEREAS, On Thursday, May 8, 1975, Roosevelt University opens a month-long celebration of its 30th anniversary; and
>
> WHEREAS, Originally intended by its founders to be known as Jefferson University, the decision was made to memorialize the late F. D. R. after his death on April 12, 1945. The new institution was not altogether new — it had roots in the old Y. M. C. A. College and in 1947 is moved into an old but distinguished home—the Auditorium Building designed by Adler and Sullivan; and
>
> WHEREAS, For a full generation now Roosevelt has been making a distinctive contribution to Chicago's educational work. It is a downtown, private, comprehensive, non-church, senior institution of higher learning—the only one in Chicago to which

all those terms can be applied. Without imposing quotas, it reflects the racial proportions of the city. Able in recent years to offer housing, Roosevelt now has a substantial number of students from outside Chicago and indeed from outside this country; and

WHEREAS, "Thirty years of responsive education" is a Roosevelt University slogan. Unsupported by either public appropriations or compulsory attendance laws, to survive Roosevelt simply had to offer services the public wants— and badly enough to pay substantial tuition to secure them. Roosevelt offers instruction at hours and on days when local working people want it. It has prepared large numbers for employment in Chicago, notably in business and in the public schools. It has attracted both youngsters just out of high school and many older students. Roosevelt has pioneered in programs for adults and for labor union personnel, and diversified by incorporating the century-old Chicago Musical College; now, therefore,

Be It Resolved, That the Mayor and members of the City Council of the City of Chicago, in meeting assembled this 8th day of May, 1975, hereby express their congratulations to Roosevelt University upon its 30th Anniversary; and

Be It Further Resolved, That a suitable copy of this resolution be presented to Roosevelt University.

Congress of U. S. Urged to Pass Emergency Middle Income Housing Act.

Honorable Richard J. Daley, Mayor, on behalf of himself and the other members of the City Council submitted the following proposed resolution:

WHEREAS, The Federal Housing Administration has for many years been an important instrument in expanding the supply of housing to our growing nation, and for providing jobs and job opportunities for many Americans; and

WHEREAS, Millions of Americans have great financial responsibilities under mortgages guaranteed by the FHA; and

WHEREAS, One of the cruelest effects of the deteriorating national economic situation has been to severely hamper the best efforts of families to carry out obligations under these mortgages; and

WHEREAS, There has been many small family home foreclosures in our City and in the nation, as well as many that are in the process of foreclosure which has a deteriorating effect on both our City and nation, not only economically, but, in a broader sense, spiritually by reaching and denying the most basic need for safe and sanitary shelter of the American people; and

WHEREAS, The high unemployment in our nation has prevented people from making mortgage payments and the present pending Congressional legislation is in the interest of protecting these unfortunate people; and

WHEREAS, The national policy of making it possible for every American family to have a home is one that must be given the highest priority; now, therefore,

Be It Resolved, That the Mayor and members of the City Council of the City of Chicago in meeting assembled this 8th day of May, A.D., 1975, hereby urge that the Congress of the United States pass the Emergency Middle Income Housing Act, HR 4485, Title V of which forestalls foreclosures of FHA mortgages; and

Be It Further Resolved, That President Ford immediately sign such legislation when presented to him.

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. The Mayor is authorized to execute and the City Clerk to attest and affix the seal of the City of Chicago upon an Agreement of Limited Agency between the City and the State of Illinois subject to the approval of the City Comptroller and as to form and legality by the Corporation Counsel; said Agreement to be in the following form:

Agreement of Limited Agency

Federal Project No. 8-17-0022-06
Illinois Project No. 75A-26-638

This Agreement, made and entered into by and between the Department of Transportation, Division of Aeronautics of the State of Illinois (hereinafter referred to as "Division"), for and on behalf of the State of Illinois, party of the first part, and City of Chicago (hereinafter referred to as "Municipality"), party of the second part.

WITNESSETH:

Whereas, the Municipality has undertaken the improvement and betterment of a public air navigation facility, known as Chicago-O'Hare International Airport and pursuant thereto has sponsored various projects under the Airport and Airway Development Act of 1970; and

Whereas, the Municipality desires to sponsor a project for the further development of said Chicago-O'Hare International Airport to be known as Project No. 8-17-0022-06 under the Airport and Airway Development Program and the provisions of the Federal Airport Act and the regulations promulgated pursuant thereto; and

Whereas, the Municipality has accordingly requested Federal financial assistance in the accomplishment of Project No. 8-17-0022-06 and responsive thereto the Federal Government, through the Federal Aviation Administration, has issued to the Municipality a Tentative Allocation (or Allocations) in the sum of Three Million, Nine Hundred Thousand and no/100 dollars ($3,900,000.00); and

Whereas, the Municipality has appropriated certain monies for the improvement of Chicago-O'Hare International Airport; and

Whereas, the Municipality has requested the Division to act as its agent in certain matters connected with said Project No. 8-17-0022-06 pursuant to statute; and

Whereas, the parties hereto by this Agreement intend (a) to fix their respective responsibilities, with reference to each other, with reference to the accomplishment of said Project No. 8-17-0022-06 and with reference to participation by the United States, and (b) to designate the parties to accept, receipt for and disburse all funds and payment of the Federal Government and of the Municipality used or to be used in payment of the costs and expenses as shall have been incurred by the parties hereto or either of them.

Now, Therefore, for and in consideration of the benefits which will accrue to the parties hereto by virtue of this Agreement and the respective covenants herein contained, it is mutually covenanted and agreed as follows:

1. The Municipality shall be the "Sponsor" of the Project above identified, except as set-forth in paragraph 2 immediately hereafter following.

2. The Division shall contribute financial assistance to the extent hereinafter stated, and furnished project reporting liaison with the Federal Aviation Administration.

3. As between the Municipality, the State of Illinois and the United States, the Municipality shall be the contractual party to such construction contract or contracts as shall be entered into for the accomplishment of the project, subject only to the agency provisions hereinafter set out.

4. Plans, specifications and estimates for said project have been prepared by or at the instance of the Municipality, copies of which will be submitted to the Division of Aeronautics for review prior to the advertising for bids thereon.

5. The Municipality will provide adequate, capable and qualified Illinois Licensed resident project engineer(s) and materials testing technician(s), and will further prepare and transmit such project reports as shall be required by the Federal Aviation Administration, or the Division, including semifinal and a final inspection report on the project work (or, if more than one construction contract is involved, then on each phase of the project work which is covered by separate contract). In its final inspection report or reports shall certify to the Division that the work involved has been fully completed in accordance with the plans, specifications and contract, as the same shall have been modified or supplemented by change order, supplementary contract or otherwise, and that such work is accepted.

6. The Municipality hereby designates the Division, as its Agent, and the Division hereby accepts said designation to act as Agent for the Municipality.

   (a) To exercise such direction of the project work as its personnel will permit but limited to a determination that the project is being completed in accordance with plans and specifications, provided that neither the Division nor the State shall be held responsible or be chargeable for any damage resulting from performance or attempted performance of said project work or for any other cause or reason.

14. To the extent that the Project Application or Grant Offer requires, this Agreement is made subject and subordinate to the provisions thereof.

15. This contract shall be and is deemed to be one entered into pursuant to the Illinois Aeronautics Act of the State of Illinois, and shall be construed and given effect in accordance with said Act and not otherwise.

City shall require its contractor (or contractors) to give written notice to Railroad in care of its Chief Engineer, Chicago, Illinois, at least 72 hours in advance of the time the contractor intends to start any work on Railroad's right of way.

Work or operations shall not be resumed until such approval, which shall not be unreasonably withheld or delayed, has been obtained. The approval of the Railroad's Chief Engineer shall not be considered as a release from responsibility or liability for any damage which Railroad may suffer, or for which it may be held liable by the acts of the contractor or those of his subcontractors or his or their employees.

Section 9. The City shall pay to the Railroad the cost of all protective measures required by the Railroad in accordance with the provisions as set forth in Section 8 of this Agreement in the following manner:

(a) Prior to the commencement of any work by the Railroad, the Railroad shall first obtain written consent from the City.

(b) Prior to the commencement of any work by Railroad, Railroad shall submit to City a detailed estimate of the reimbursable costs to be incurred by it in the performance of this Agreement, which estimate shall be used solely for the purpose of billing in the manner hereinafter provided and shall show in reasonable detail the amount of labor applicable to the various items of work, material quantities and unit prices, charges for equipment and appropriate percentage additions or allowances as authorized by this Agreement. (Such estimate shall be subject to approval by City).

(c) Thereafter, during the progress of the work, Railroad shall be reimbursed within 60 days following receipt of bills on the basis of the current percentage of physical completion attained for each such work item, including materials furnished to the job site, as certified pursuant to the following paragraph, which payment shall be applied to the approved total estimate cost of such work. Partial payments shall be made on this basis until each item of work has advanced to approximately 90% of physical completion, at which time reimbursement on a percentage basis will be discontinued. Thereafter, upon completion of each such work item, Railroad shall submit a final statement of costs and make suitable records available to City, and City shall, within 90 days after receipt of said final bill, reimburse Railroad for the balance of the amounts due it.

(d) Prior to commencement of work, Railroad and City shall each designate an authorized representative or representatives who shall determine and agree upon the estimated percentage of physical completion attained for each such item of work, from time to time, and such representatives shall execute a certificate specifying such percentage of physical completion which shall be attached to Railroad's periodic bills.

(e) The classifications of labor performed by Railroad's employees shall be the Railroad's then existing classification and the basic rates of pay computed therefor shall be Railroad's prevailing rates, including retroactive wage increases, if any, and all other items included in the total labor expense. Charges for material used and credits for salvage recovered shall be in accordance with accepted current practices of Railroad in joint facility billing against other rail carriers, under rules issued by the General Managers' Association of Chicago, as currently revised, provided that rental rates for equipment not embraced in such schedule shall be Railroad's established rates for rental of such equipment. In the event any work is contracted by Railroad, City shall reimburse Railroad for the cost thereof in accordance with the said rules of the General Managers' Association of Chicago.

Section 10. Before the commencement of any work under this Agreement, City shall require its contractors to procure insurance of the following kinds and amounts and to carry such insurance until completion and acceptance by City of the work:

(1) Liability Insurance, in an amount not less than $500,000 for injuries including wrongful death, to any one person, and subject to that limit for $1,000,000 on account of any one accident or occurrence; and

(2) Property Damage Insurance in an amount of not less than $500,000 for all damages arising out of injury to or destruction of property in any one accident or occurrence, and, subject to that limit for any one accident, a total amount of $1,000,000 for all damages arising out of injury to, or destruction of, property during each year of the policy period.

(3) Workmen's Compensation Insurance as required by law and Employer's Liability Insurance in the amount of $100,000 per occurrence.

The above-mentioned policies for Public Liability and Property Damage Insurance shall be written so as to include Contingent Liability and Contingent Property Damage Insurance to protect the contractor against claims arising from the operations of subcontractors. All said policies shall include the Railroad as Co-Insured. Any change in the insurance provided in accordance with this Article shall not be made until Railroad has received ten (10) days' written notice thereof.

Section 11. City shall require its contractor (or contractors) upon final completion of the work of such contractor (or contractors) to remove from within the limits of Railroad right of way all machinery, equipment, surplus materials, falsework, rubbish or temporary buildings of such contractor (or contractors) and leave such right of way in a condition satisfactory to the Chief Engineer of Railroad.

Section 12. City shall require its contractor (or contractors) to furnish bond in the amount of the full contract price with a responsible surety company guaranteeing the satisfactory performance of the work herein.

Section 13. City hereby reserves the right to transfer its authority to construct, maintain, and operate the Middle Marker, Rail and other future navigational aids to be constructed under the provisions of this Agreement to the FAA. Such transfer shall be required to be in agreement with the regulations of Railroad to insure complete protection and safety of their properties and operations.

Section 14. This Agreement shall inure to the benefit of, and be binding upon the successors or assigns of the parties hereto.

In Witness Whereof, the parties hereto have caused this Agreement to be executed by their proper officers thereunto duly authorized on the day and year first above written.

Whereas, The Board of Health of the City of Chicago has determined that it is in the best interests of the citizens of the City of Chicago to require that grade A milk be sold to consumers not later than six days after the day of pasteurization; and

Whereas, Milk producing companies have for some time voluntarily agreed to distribute and sell milk within the City of Chicago in accordance with such 6-day period; and

Whereas, The Board of Health and the Department of Consumer Affairs of the City of Chicago through investigations and citizen complaints have determined that the voluntary agreement does not always work satisfactorily; and

Whereas, The Board of Health, at the request of the milk industry, has recently, after extensive studies, reaffirmed its determination that a 6-day limitation on the sale of milk within the City of Chicago is in the best interests of its citizens; and

Whereas, "The power to regulate for the protection of the public health . . . and welfare" is specifically reserved to home-rule units, including the City of Chicago, by Article VII, 56½ of the 1970 Constitution of the State of Illinois; now, therefore,
